SynaPeds

simple steps to prevent RSV

Let us help you protect your patients
against RSV with the most effective
and efficient bridge between Infant
and Synagis.

SynaPeds

simple steps to prevent RSV

King Drug and Home Care is proud to be a regional provider of Synagis. Our SynaPeds program is designed to be the most effective and efficient bridge between the infant and family, the health care provider and Synagis.

What is Synagis?

- Synagis is a monoclonal antibody specifically designed to neutralize the Respiratory Syncytial Virus (RSV)
- Synagis provides prophylaxis against infection to high risk infants
- Synagis is administered once monthly during peak RSV season
- Studies show that Synagis reduced the incidence of RSV hospitalizations by 78% non-CLD in pre-term infants and 82% in infants born at 32-35 weeks without CLD.

What is SynaPeds?

King Drug and Home Care's Synagis Distribution and Education Program. The SynaPeds program facilitates Synagis orders by physicians, coordinates delivery to health care provider in the home or clinic and continually educates family for optimal compliance.

What does SynaPeds offer you the health care provider?

- Verify insurance coverage and notification of benefits to family - Medicaid, Passport, Private
- Will pre-authorize all referrals.
- Set up home health care when needed. We make the call, so you don't have to!
- Provide patient education materials and bilingual information
- SynaPed personnel are readily accessible to answer any questions and provide guidance when needed

Visit SynaPeds.com for additional information about the program, forms for referring Synagis and additional information concerning RSV and Synagis. You may also contact Janie Tichenor, RN, BSN-Infusion/Synagis Coordinator at jtichenor@kingdrug.com
